

PH7-30

Acid condensate neutralizer

Into the box

Neutralizer
mm 420 x 300 x H 240

Neutralizer granular refill
Neutralkit

Max 1500 kW

A good practice is to neutralize the acid condensate coming from the boilers. This condensate flows through neutralization granulate inside the neutralization box which has two functions: first, the absorption of nitrates and sulphates; second, rising the PH. The condensate acidity could be checked with a litmus paper to determine the PH (available as accessory), or with appropriate PH test.

Code	Article	Description
SP0409PH702	PH7-30	Acid condensate neutralizer
SPN0409026	NEUTRALKIT26	Granular Neutralkit

Ref.	Description
1	Inlet connection G 1"
2	Neutralizer granular refill Neutralkit
3	Inlet filter T Shape
4	Neutralizer box
5	Outlet filter with cap
6	Outlet connection 1" G

Technical data

- Max generator power.....1500 kW
- Max flow150l/h
- Minimum inlet head..... 130 mm
- Voltage power.....no
- Inlet and outlet connection.....1"G
- Dimension cm.....42x30x24
- Mineral load......25 Kg
- Long-life at max flow.....1800 h

Example of installation

1- wall-mounted
or floor standing boilers
